

Kartavya Dev

B.Tech — Data Science & AI — 2027

+91 7374084224 — kartavya.dev.23cse@bmu.edu.in — LinkedIn — GitHub — Portfolio

Education

Bachelor of Technology (B.Tech), Computer Science Engineering
BML Munjal University, Gurugram

2023 – 2027
CGPA: 8.72 / 10.0

Technical Skills

Machine Learning & AI: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Generative AI, LLMs, GPT Models, TensorFlow, PyTorch, Scikit-learn

Programming & Development: Python, SQL, Flask, Django, APIs

Cloud/Tools: AWS, GCP, Azure, Git, GitHub

Concepts: Data Structures and Algorithms, Databases, Data Analysis, Data Preprocessing, Feature Engineering, Model Training, Machine Learning Pipelines, Problem-Solving, Analytical Thinking, Collaboration

Projects

EAOS Simplified – AI-Assisted Email Operations Platform

2026 — Live — GitHub

Tech: FastAPI, React.js, PostgreSQL, Gmail SMTP/IMAP

- Engineered AI-powered outreach automation platform supporting 1K+ email workflows with batch sending, inbox synchronization, and intelligent reply generation.
- Architected thread-aware response pipelines and approval-first AI workflows, improving response management efficiency by 40% using FastAPI and PostgreSQL.

KishanBhai – AI Agricultural Assistance Platform

2025 — Live — GitHub

Tech: React.js, Next.js, Flutter, Firebase, Gemini AI

- Built multilingual AI-powered agricultural platform with crop disease detection, market insights, weather forecasting, and voice-based farmer assistance across 5 Indian languages.
- Developed scalable full-stack workflows with real-time APIs to address 30–35% annual crop losses.
- Selected for IIT Ropar incubation based on innovation potential and practical impact.

Codebase Intelligence Engine

2026 — GitHub

Tech: Python, FastAPI, PostgreSQL, Docker, FAISS, React.js

- Built scalable FastAPI microservices and PostgreSQL pipelines following SDLC practices, reducing semantic search latency by 35% through backend optimization and efficient API workflows.
- Improved testing, debugging, and FAISS-based retrieval workflows, increasing ROUGE-L by 8.4% and Domain Alignment accuracy by 47%.

Internship

Sopra Steria AI Project Intern

Jun 2025 – Jul 2025

- Developed a RAG-based chatbot using LLMs, vector retrieval, and backend APIs to enable context-aware enterprise knowledge assistance.
- Built and optimized backend workflows for document processing, semantic search, and response generation, improving system reliability and retrieval efficiency.

Achievements and Certifications

- 3rd Place — IIT Ropar GenAI Hackathon.
- Finalist — Google Agentic AI Hackathon 2025.
- Top 8 — Amity Innovation Challenge 2025.
